

Commodity Credit Corporation, USDA

§ 1435.314

quantity of sugar produced in Louisiana, plus a normal carryover inventory, will exceed the State's allotment, CCC will establish for each sugarcane producing farm a proportionate share that limits the sugarcane acreage that may be harvested on the farm for sugar or seed.

(c) For purposes of determining proportionate shares CCC will:

(1) Establish the State's per-acre yield goal at a level not less than the average per-acre yield in the State for the 2 highest years from among the 1999 through 2001 crop years;

(2) Adjust the per-acre yield goal by the State average recovery rate;

(3) Convert the State cane sugar allotment into a State acreage allotment by dividing the State allotment by the adjusted per-acre yield goal;

(4) Establish a uniform reduction percentage for the crop by dividing the State acreage allotment by the sum of all adjusted acreage bases in the State as determined under § 1435.312; and

(5) Apply the uniform reduction percentage to the acreage base established for each sugarcane producing farm in the State to determine the farm's proportionate share of sugarcane acreage that may be harvested for sugar or seed.

§ 1435.312 Establishment of acreage bases under proportionate shares.

(a) CCC will establish a sugarcane crop acreage base for each farm subject to proportionate shares as the simple average of the acreage planted and considered planted for harvest for sugar or seed on the farm in the 2 highest of the 1999 through 2001 crop years. Acreage considered planted shall be determined under § 1435.315.

(b) In establishing crop acreage bases, CCC will:

(1) Not consider acreage prevented from planting, and

(2) Consider acreage planted to sugarcane that fails.

(c) In establishing crop acreage bases, CCC will allow producers who have not previously reported their sugarcane acreage to do so by a date CCC determines and announces. Late-filed acreage reports will be accepted as the Deputy Administrator determines appropriate.

(d) The farm's crop acreage base shall be used to determine the farm's proportionate share.

(e) The regulations at part 718 of this title shall apply to this subpart, except reconstitution of farms with a sugar crop acreage base shall not be allowed across State lines.

§ 1435.313 Permanent transfer of acreage base histories under proportionate shares.

(a) A sugarcane producer on a farm may transfer all or a portion of the producer's acreage base history of land owned, operated, or controlled to any other farm in the State that the producer owns, operates, or controls under the Deputy Administrator-issued instructions. The transfer will reduce permanently the transferring farm's sugarcane acreage base history and increase the receiving farm's crop acreage base.

(b) All farm owners must agree in writing to the transfer.

(c) Producers may transfer sugarcane acreage base histories under this section by the date the State FSA committee establishes annually.

§ 1435.314 Temporary transfer of proportionate share due to disasters.

(a) If, for reasons beyond the control of a producer on a farm, such producer is unable to harvest sugarcane acreage relative to all or a portion of the proportionate share established for the farm, the Secretary may preserve, on producer application and written consent of all owners of the farm, for a period of not more than 5 consecutive years, the acreage base history of the farm to the extent of the proportionate share involved.

(b) Such proportionate share may be transferred, with the written consent of all owners of the farm, for 1 crop year to other farm owners or operators subject to the following conditions:

(1) The acreage base history of the transferring farm will be preserved for a period from 1 to 5 years; and

(2) Acreage base history will not be increased on the receiving farm.

(c) Producers who transfer a proportionate share under this section will be required to:
